### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2 and 4-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Ochi et al (EP 1059372 A2) for the reasons of record.

3. Claims 1, 2 and 4-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Koyanagi et al (U.S. Patent Application Publication 2003/0052436 A1) for the reasons of record.

4. Claims 1, 2 and 4-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Chang et al (U.S. Patent Application Publication 2002/0025433 A1) for the reasons of record

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S.

Art Unit: 1732

filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Chang et al (U.S. Patent Application Publication 2002/0025433 A1), Koyanagi et al (U.S. Patent Application Publication 2003/0052436 A1) or Ochi et al (EP 1059372 A2) for the reasons of record.

***Response to Arguments***

7. Applicant's arguments filed on 20 July 2006 have been fully considered but they are not persuasive.

Art Unit: 1732

8. Applicant argues (page 6) that none of the cited references anticipates the instant claims, and that none of the cited references render the claimed subject matter obvious. Examiner responds that the cited references anticipate the claims (i.e., claims 1, 2 and 4-8) principally because the aspect of a maximum shrinkage spinning rate (or MSSR), as well as the determination of a MSSR, is inherent in the process of each one of the cited references principally because, just as in the instantly-claimed process, each one of the cited references teaches a spinning process using at least two crystallizable polyester polymers to make polyester bicomponent fibers having latent crimp.

Furthermore, the aspect of MSSR, as well as determination of MSSR, would have been obvious to one of ordinary skill in the art at the time the invention was made in view of any one of the cited references principally in order to manufacture a desired polyester bicomponent fiber product (e.g., a product having a desired amount of latent crimp).

#### **Conclusion**

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS

Art Unit: 1732

of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
